

LIFTING GLASS AND WINDSCREENS

Lifting glass and windscreens with vacuum

LIFTING WINDOWS FOR BUSES

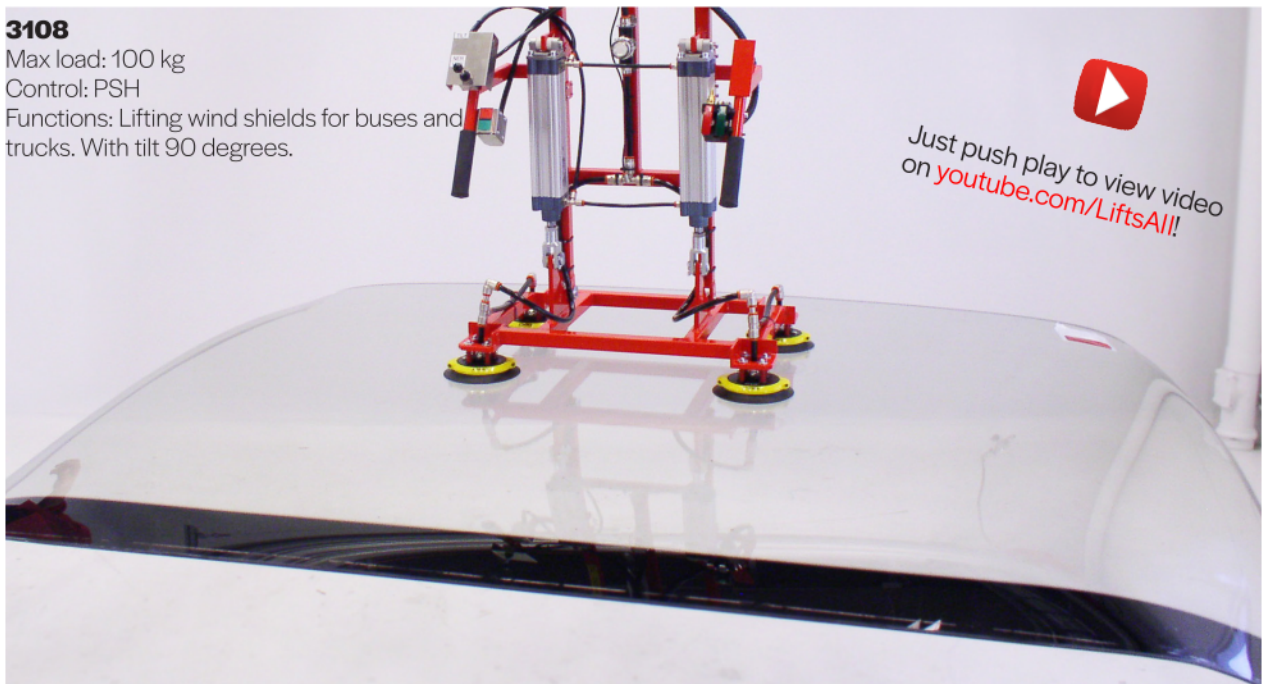

Our lifting tool for bus windows is designed to effortlessly lift and tilt bus windows with a remarkable lifting capacity, offering options of 100 kg and 200 kg. The gripper is equipped with a 90° tilt feature, ensuring the load is balanced safely and smoothly. Powered by compressed air, our gripper allows operators to lift heavy loads quickly and securely without straining the body. The ergonomic design of our tool not only enhances productivity but also makes the lifting process considerably easier for operators, prioritizing their well-being and comfort.

3108

Max load: 100 kg

Control: PSH

Functions: Lifting wind shields for buses and trucks. With tilt 90 degrees.

LIFTING WINDSCREENS

This gripper is designed for effortless lifting and tilting of windcreens weighing up to 25 kg. Equipped with flexible vacuum cups, it can easily handle both concave and convex windshields, ensuring a quick and smooth operation.

Thanks to the pneumatic hoist system, the gripper's weight is perfectly balanced, creating a virtually weightless experience for the operator. This allows the operator to focus solely on steering the windscreen with precision, making the task even more efficient.

LIFTING WINDSCREENS 92-10018

Max load: 25 kg
Control: Dual
Balancing
Functions: Lifting wind shields for cars. With tilt 90°.

LIFTING GLASS PANES 89-12173

Max load: 45 kg
Control: proportional speed control (PSH)
